Paralegal Technology is an exciting field of study that provides training in analytical, communication, research, and technical skills and prepares individuals to perform specifically delegated legal work for which a lawyer is responsible.

Why ICC?

All courses are offered online so students have flexibility and the ability to be employed part- or full-time while completing the program. Student internships are available which allow students to meet people in the legal community, to apply concepts learned in their courses and to gain practical experience before entering the workforce.

Benefits of Paralegal Technology

Degree Options:

- 1 year certificate of completion or AAS degree. After graduation, there are voluntary national certifications through NALA or NFPA.

Job Market:

- Paralegals, legal assistants in law firms and for solo practitioners, government agencies and businesses.
- Positive job outlook for paralegals: The US Bureau of Labor Statistics projects 17 percent employment growth from 2012 to 2022, faster than the average for all occupations.

Get the skills you need for the job you want!
