This curriculum is for an Associate of Arts degree and provides an education in the field of General Business and a pathway to immediate employment either while students are in the process of taking courses with Itawamba Community College through internship and co-op courses or upon completion of the degree. Students may also transfer to a university into majors such as Business Administration (Management), General Business, Finance, Accounting, Economics or Marketing. If transferring to a university, students must refer to their curriculum guide for a more detailed listing of requirements. For example, Accounting Majors at the University of Mississippi require Business Calculus I and Business Calculus II. These students who wish to transfer at a later date must take the courses that will enable them to successfully enter their desired programs.
